1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 3-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 3 there is insufficient antecedent for the recited upper sheet. It is not clear how this sheet is related to the claimed holder. Claims 4-7 are vague as to whether the same or different openings than those in claim 1 are being claimed. The claims are also vague as to the number of openings encompassed thereby.
3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Berry (cited by applicant) in view of Franklin or Jordan. Berry discloses most of the elements of the claims (note especially the embodiments with multiple pockets), but lacks pockets of differing sizes. Either Franklin or Jordan is cited to show that it is conventional to construct pockets of differing sizes to hold differently sized content. It would have been obvious in view of either Franklin or

Jordan to provide the pockets of Berry in different sizes, for the purpose of facilitating the retention therein of differently sized cable ties.
